SYSTEMATIC INNOVATION

 **GEALAN**

**S 9000**

## S 9000

GEALAN-FUTURA® is our highlight in the modular S 9000 combination system with an installation depth of 82.5 mm and is suitable for construction of passive house windows acc. to ift regulation WA-15/2, available in full colour.

**STV®**  
 Static dry glazing

## STV®-integrated

With GEALAN-FUTURA® it is also possible to use and benefit from the innovative, RAL-certified GEALAN STV® (Statische-Trocken-Verglasung, engl. static dry glazing) glass adhesion method. Wing sizes up to 2.40 m are possible with STV® and standard bracing.

**IKD®**  
 Intensive core insulation

## IKD® integrated

By specific application of IKD® (Intensiv-Kern-Dämmung, engl. intensive core insulation) insulation technology, outstanding thermal insulation properties are also achieved in coloured windows.

**acrycolor**  
 Unique coloured surfaces

## Flexible

Even with excellent thermal insulation properties, GEALAN-FUTURA® provides all and any surface finish options since the section combination is available with decorative foil or aluminium shells and in future also with the unique acrycolor surface finish.
